SUMMARY

Full-stack developer with strong expertise in **React** and **Next.js**, building AI-powered web applications, privacy-preserving systems, and scalable REST APIs. Passionate about creating seamless user experiences and robust backend architectures. Proven track record in national hackathons; seeking a summer 2026 internship to deliver impactful, production-grade solutions.

EDUCATION

Heritage Institute of Technology

Bachelor of Technology in Information Technology
Shree Jain Vidyalaya

Class 12 – 93%

Kolkata, India

Aug 2024 – Jun 2028 (Expected)
Kolkata, India

Mar 2022 – Jun 2024

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript

Frontend: **React 19**, **Next.js 14 (App Router)**, HTML, CSS, Tailwind CSS, React Router DOM

Backend: FastAPI, REST APIs, Next.js API Routes, JWT Authentication, SQLAlchemy ORM

Databases: SQLite, MongoDB, Firebase

Tools: Git, GitHub, Docker, AWS, Linux, Vite

Core: Data Structures & Algorithms, OOP, System Design, Competitive Programming

PROJECTS

MAITRI – AI Mental Health Companion | **React**, Python, Voice AI, Facial Recognition

2025

- Built a fully **offline** AI mental health companion for astronauts, pilots, and high-stress professionals using voice input and real-time facial emotion recognition (happy, sad, stressed, anxious).
- Engineered an emotion detection pipeline that instantly recommends personalised cures, breathing exercises, and interventions based on detected emotional state – available 24/7 with zero connectivity.
- Implemented an **EIB (Emotional Intelligence Briefing) summary system** generating periodic wellness reports for mission control and self-assessment; designed to scale across aviation, healthcare, and everyday use.

MedEzee – AI Health Companion | **React 19**, Vite, FastAPI, SQLite | [🐙 GitHub](#)

2025

- Architected a full-stack healthcare app using **React 19** with Tailwind CSS and React Router DOM, delivering an Apple Health-inspired responsive UI with dark mode.
- Built a FastAPI backend with JWT auth, SQLAlchemy ORM, AI symptom analyzer, health chatbot, and live AQI hazard detection via OpenWeatherMap API.
- Integrated RxNorm (US Government) API for real-time brand-to-generic medicine conversion rendered on the **React** frontend.

ZK-UPI – Privacy-Preserving Payment System | **Next.js 14**, TypeScript, MongoDB | [🌐 Live](#)

2025

- Built a full-stack privacy-first payment prototype in **Next.js 14** using App Router, server components, and **Next.js API routes** as the backend layer.
- Implemented SHA-256 cryptographic commitment hashing for anonymous wallets; built merchant QR flow and real-time transaction explorer with **React** state-driven UI and MongoDB persistence.

Rural Roots – AI Crop Disease Detection | Python, AI/ML, FastAPI

2024

- Developed an AI-powered crop disease detection platform integrating geotagging and IoT sensor data for real-time field analysis for rural farmers. [ruralroot.netlify.app](#)

ACHIEVEMENTS

Smart India Hackathon (SIH) 2025 – Top 5 / 500+ Teams | ISRO, Ahmedabad

Dec 2024

- Ranked **Top 5 out of 500+ teams** at ISRO Ahmedabad; built MAITRI – an offline AI mental health system for astronauts – under strict time constraints.

Fin Conclave HR Competition – 1st Place Winner

2024

- Secured **1st place** by designing an innovative HR-tech solution demonstrating strong technical depth and presentation skills to a panel of industry judges.

HackAmong Us – Top 30 / 400+ Teams

2024

- Placed **Top 30 out of 400+ teams**, delivering a competitive full-stack technical solution within hackathon time constraints.

Hack Heritage 3.0 – Top 50 | Inter-College Hackathon

2024

- Placed **Top 50** among competing college teams in a multi-round inter-college hackathon, demonstrating collaborative problem-solving under pressure.
